# Overnight report, build 90, 17 Oct 2026

App commit `5d3de5b` (About shows it). TestFlight build number 91, internal group "Team (Expo)". Server `/api/health` commit `0d36821`. Simulator: GRIIT iPhone 16, iOS 26.4, Release build of the same commit (a TestFlight binary cannot be installed on a simulator). Harness: `feat/agent-testers` (agents/src/build90.ts). Spend: 2.31 USD, 1005 calls, 1717539 in, 118945 out.

## Main number

**4 of 13 fresh personas reached Day secured (31%).** Oct 15 baseline: about 10 of 38 (26%).

## Also

| Number | Value |
|---|---|
| Sessions | 40 |
| Joined | 33 (83%) |
| First task opened | 10 (25%) |
| Task finished | 21 (53%) |
| Photo | 11 (28%) |
| Median Done → post-or-private sheet | 752 ms (13 finishes) |
| Median sheet choice → task shows as done | 2559 ms (11 finishes) |
| Median photo post (Post to friends → done marker) | — |
| Concept score (exit interview) | 29% of 40 interviews × 3 words |
| Would open tomorrow (median of 10) | 8 |
| Fresh personas that started at Welcome | 13 of 13 (Oct 15: 7 of 38) |
| Sessions under 15 steps, not a crash | 0 (Oct 15: 11 ended early) |
| Ended on a repeated screen (after 15 steps) | 34 (Oct 15: 26) |
| Stopped on their own (after 15 steps) | 3 |
| Crashes | 0 |

## Read with this in mind

- The agents are Haiku 4.5 on a simulator, not people. A photo finish uses the simulator camera, which returns a stand-in image, and they refused to type the rude words the safety personas were given (p5-01: 10 empty replies, p5-04: 1 empty replies). The server-side filter itself is covered by chunk 07's vitest and the build90-safety Maestro flow, not by this run.
- "Ended on a repeated screen" counts sessions the harness stopped after 15 steps because the same screen came back three times. 34 of 40 here. It is a harness stop rule as much as a product signal; read the per-session rows before treating it as a dead end.
- Done timing: Done → sheet is measured on every self-reported finish (13). Choice → done marker is only counted when the marker showed inside the 20 s watch window (11); "only after more taps" rows mean the agent left the screen before the marker was seen, not that the app was slow.
- Day-number check: 0 real mismatches. The 202 raw entries in result.json are "Day 1 on screen, current_day 2 stored" on a secured day, which is lib/challenge-day.ts displayDay (current_day points at tomorrow once today is secured); they are dropped when the report reads the runs.
- Offline (p5-06) was not applied: no network conditioner on this Mac's simulator. p5-06 ran as a normal post.

## Scorecard

Overall **6.5** (product loop, onboarding and data integrity weighted double, as on 12 and 14 Oct; 14 Oct was 5.2). Scores are rules from the numbers in this run; the why column says which.

| # | Category | Score | Why |
|---|---|---|---|
| 1 | Product loop | 7 | 21 of 40 finished a task, 11 with a photo. |
| 2 | UX and onboarding | 6 | 4 of 13 fresh personas reached Day secured; 13 of 13 started at Welcome. |
| 3 | Frontend | 6 | Done → sheet median 752 ms; 34 sessions ended on a repeated screen after 15 steps. |
| 4 | Backend | 8 | 0 crashes; server /api/health 0d36821; 429s and server errors are in the per-step errors below if any. |
| 5 | Data integrity | 8 | 0 day-number mismatches between the screen and the database (a secured day showing current_day − 1 is the app's displayDay rule and is not counted). |
| 6 | Performance | 4 | Median sheet choice → done marker 2559 ms; photo post —. Release build on the simulator; measured by polling the view hierarchy (one poll ≈ 0.5–1 s, so read ± 1 s). Done → sheet 752 ms is the pure UI step. |
| 7 | Reliability | 8 | 0 of 40 sessions hit a launch or step crash. |
| 8 | Security and privacy | 5 | 0 of 6 safety personas saw a blocked-word message; 2 typed a rude word (p5-02, p5-03), 0 submitted it to the server. Not measured in this run; the filter is covered by chunk 07 tests. is_test on every account. |
| 9 | Tests | 7 | Chunk 01–09 vitest files 469/469 in one run; full vitest the 4 baseline failures only; tsc 5 baseline errors. |
| 10 | Words (concept) | 4 | Concept score 29%: secured 18, freeze 4, self-reported 13 of 40. |

## What the screenshots show

Read from the screenshots, not the numbers. Paths are under `docs/reports/oct-build90/`; the cited frames are copied into `evidence/` (every session's full `shots/` folder stays on this Mac, not in git). App code was not changed for any of these (chunk 10 rule); each is for Yaseen to pick up.

1. **After a photo post, the Proof screen traps the person.** Day secured → Close lands on `app/post/[id]` ("Proof"). The back chevron does nothing (`router.back()` with nothing behind it after the replace), and the Done button sits under the comment composer until the list is scrolled (`evidence/01-proof-trap-p4-01b-006.png`, `-013.png`: six back taps, same screen; the orange edge at the bottom is the hidden Done). 5 of the 11 photo sessions ended here: p1-02, p2-06, p3-02, p4-01b, p4-02b. This is the biggest single reason photo finishers did not continue.

1. **Onboarding can hand a brand-new person a task that is already closed.** p2-10 (Elena, fresh, 4:39 pm) picked "Daily habits"; Start here pre-selected Early Riser 7, whose task "Up and out of bed" has a 12:00–6:30 am window. Day 1 cannot be secured. The app says so in two places that disagree: the task flow shows "Window closed at 6:30 am. Today is not secured." (`evidence/02-window-closed-p2-10-018.png`) while Home shows "Couldn't save. Tap to try again." under the streak card (`evidence/02-couldnt-save-p2-10-019.png`), a retry that can never succeed today. Suggest: do not pre-select a windowed challenge when the window is closed, and give the rollback line the real reason.

1. **Home can show "Day secured. See you tomorrow." and "Day 1 is today. Finish the task to secure it." on the same screen**, with the Day 1 ring empty while "1 day in a row" and "1 of 1 done" are shown (`evidence/03-home-disagrees-p1-01-006.png`, `-008.png`, three steps, about a minute). Other secured Homes are consistent (`evidence/03-home-consistent-p5-06-021.png`: ring ticked, one caption). Looks like the streak card and the Today caption come from different cache keys and one did not refresh after the finish (chunk 05.4 territory).

1. **Create step 1 says "Looks good" under a title the server will reject.** p5-03 typed "shit list"; the inline hint under the field read "Looks good 9/60" (`evidence/04-looks-good-p5-03-004.png`). The server check runs at Review/create (chunk 07) and the agent never got there, so the filter itself was not exercised in this run; the hint is the finding.

1. **The last goal cards on "What are you building?" sit under the docked button.** "Faith and prayer" is the seventh card; its visible part is behind "Pick at least one" (`evidence/05-goal-under-footer-p2-07-006.png`). p2-07 tapped it twelve times and never selected it; a scroll did not reveal it either. Add bottom padding equal to the footer so every card can be reached.

1. **Create step 1 keeps the keyboard up, with Solo/Group under it.** p4-01a typed the title and then could not reach "Group" (59 taps; `evidence/06-keyboard-solo-group-p4-01a-010.png`, Continue docked above the keyboard, Solo/Group below). A person would dismiss the keyboard; the agent did not. Low priority, but the toggle is invisible at the moment the person needs it.

1. **Counter task caps at the goal with no word about it.** "Read 10 pages": at 10 of 10, Add one / +5 / +10 dim and do nothing (`evidence/07-counter-cap-p3-04-007.png`). p3-04 and p3-05 wanted to log 12 and 15 and stopped there instead of tapping "Done · 10 pages". A one-line "Goal reached, Done saves it" would do.

1. **Words.** 40 interviews: secured 18 right, freeze 4, self-reported 13. Nobody who did not open a challenge detail or the Start here cards had seen a freeze explained; the Start here cards repeat "Missed a day? A freeze holds your streak. You earn one every 7 days in a row." three times on one screen (`evidence/08-start-here-freeze-x3-p2-09-007.png`), which is the same copy-repeat pattern 06.2 removed for "Self-reported".

Harness, not product (fixed on `feat/agent-testers` where it could be): typing into the journal field failed after the first sentence (p2-01, p2-04, p3-06, p3-08: "inputView" not found; Maestro cannot append to a focused multiline field by label); the model would not type the rude words (p5-01); "radio button" as a target resolves to the first card (p2-09); Done timings that showed up only after more taps are dropped (see "Read with this in mind").

## Chunks

### 1-speed: Speed

6 sessions. Build 90, GRIIT iPhone 16 simulator.

### Funnel

| Step | Count |
|---|---|
| Joined | 6 |
| First task opened | 2 |
| Task finished | 6 |
| Photo | 2 |
| Day secured seen | 6 |
| Sessions under 15 steps (not a crash) | 0 |
| Early stops refused by the harness | 14 |

### Done to visible

| Persona | Task | Done → sheet | Choice | Choice → done marker | Marker |
|---|---|---|---|---|---|
| p1-01 Dev | 7K STEPS | 752 ms | Keep it private | 2370 ms | Day secured |
| p1-02 Mia | Proof | 767 ms | — | — | not seen |
| p1-03 Leo | post-choice-sheet | — | — | 1596 ms | 1 of 1 done |
| p1-04 Ana | 10 PAGES A DAY | 747 ms | — | 7338 ms | 1 of 1 done |
| p1-05 Noor | Journal Today · finished | — | — | — | day secured only after more taps (> 20 s) |
| p1-06 Ray | Proof | 770 ms | — | — | day secured only after more taps (> 20 s) |

Median Done → sheet: 760 ms. Median choice → done marker: 2370 ms. Median photo post (Post to friends → done marker): —.

### Sessions

### 6-words: Words

Exit interview, asked of every persona at the end of the session. 40 of 40 answered.

| Word | Right | Wrong | Share right |
|---|---|---|---|
| Secured | 18 | 22 | 45% |
| Freeze | 4 | 36 | 10% |
| Self-reported | 13 | 27 | 33% |

Concept score: 29% (right answers over three words × 40 people). Would open tomorrow: median 8 of 10 (40 gave a number).

Scoring rules are in agents/src/interview.ts: secured = every task of the day done so the day counts; freeze = a missed day that does not break the streak; self-reported = marked done by the person, no proof.

### Answers

| Persona | Chunk | Secured | Freeze | Self-reported | Tomorrow |
|---|---|---|---|---|---|
| p1-01 Dev | 1-speed | right: Day secured means you've completed your daily goal (7,000 steps) and locked in your progress for that day. | wrong: The app never explained what a freeze is. | right: Self-reported means you manually logged or confirmed the 7,000 steps yourself rather than it being automatical | 9 - I like watching the number move and the streak counter is satisfying; I want |

2. other: Gave up. other repeated 3 times. (14: p2-01, p2-04, p2-05, p2-08, p3-01, p3-04)
3. challenge: the same screen came up 3 times (12: p1-02, p1-06, p2-06, p2-11, p3-02, p3-03)
4. challenge: Gave up. challenge repeated 3 times. (11: p1-02, p1-06, p2-06, p2-11, p3-02, p3-03)
5. Start here: radio button is already selected. (11: p2-01, p2-02, p2-03, p2-04, p2-06, p2-08)
6. home: the same screen came up 3 times (10: p1-01, p1-03, p1-05, p1-06, p2-03, p2-12)
7. home: Gave up. home repeated 3 times. (6: p1-01, p1-03, p1-05, p2-03, p2-12, p5-06)
8. onboarding: the same screen came up 3 times (3: p2-07, p2-09, p2-11)
9. 7K Steps challenge: Failed to run flow: Element not found: Text matching regex: Join 7K Steps (2: p1-01, p5-06)
10. Day secured: Failed to run flow: Element not found: Text matching regex: Go back (2: p1-01, p5-06)
11. Day secured: Home is already selected. (2: p1-05, p5-06)
12. 7-Day Gratitude Journal Day 1: Failed to run flow: Element not found: Text matching regex: inputView (2: p2-01, p2-04)

## Quotes

- Dev (1-speed, Day secured): "Why isn't the Done button working? I've tapped it multiple times and the screen is still showing the same Day secured modal."
- Mia (1-speed, Proof): "Why does tapping Done not advance? Is there another step I'm missing?"
- Priya (2-first-day, All challenges): "The radio button keeps saying it's already selected, but I haven't actually joined the challenge yet. Tapping the radio button doesn't work. I need to figure out how to actually enter/join this challenge."
- Elena (2-first-day, Up and out of bed): "Why isn't the camera opening? The buttons seem to exist but nothing happens."
- Ruth (3-task-types, Share): "Steps 6-9 seem to be going in circles with Share and Close buttons"
- Felix (5-safety-edge, Day secured): "The Share dialog seems persistent - I tapped Share today but I'm still on Day secured"
